SUMMARY

Full-stack developer with 7 years building cross-platform mobile and web products end to end. At a software studio, I delivered Flutter and Next.js applications for clients across the US, Europe, and the Gulf, growing from junior to senior engineer and owning architecture, code review, and release cycles. Alongside client work I have shipped my own SaaS products - 7 apps live on the App Store and 3 production Next.js + Supabase platforms. Deep Flutter expertise paired with full-stack Next.js, Supabase, and PostgreSQL. I am now looking to bring that ownership into a product engineering team and go deep on building.

TECHNICAL SKILLS

Mobile: Flutter, Dart, iOS & Android release pipelines, App Store / Play Store deployment, GetX, Bloc, Riverpod, offline-first sync, push notifications, in-app purchases

Web: Next.js (App Router), React, TypeScript, JavaScript, Tailwind CSS, server actions, SSR/ISR

Backend & Data: Supabase, PostgreSQL, Firebase, row-level security, REST APIs, authentication, Stripe & Lemon Squeezy payments

Practices: System design, multi-tenant architecture, code review, CI/CD (GitHub Actions), automated testing, async remote collaboration, Git

PRODUCTS BUILT & SHIPPED

Designed, built, and released end to end. All live and publicly available.

- **CueDesk** - Snooker club management SaaS; Flutter app plus Next.js + Supabase platform. cuedesk.app
- **Beeguide** - QR-driven digital welcome guides for short-term rental hosts; Next.js, Supabase, multi-tenant, subscription billing. www.beeguide.app
- **Lab of Elixirs** - Cosmetic formulation platform; Flutter app with ingredient percentage engine and INCI barcode scanning, plus Next.js admin dashboard. labofelixirs.com

Also on the App Store:

- **CueDesk** - club management for snooker venues. [App Store](#)
- **Lab of Elixirs** - cosmetic formulation tool. [App Store](#)
- **Quivo Invoice Generator** - invoicing with PDF generation and client management. [App Store](#)
- **MyInvite** - digital event invitations and RSVP. [App Store](#)
- **MyWallet Finance Manager** - personal finance tracking and budgeting. [App Store](#)
- **TaskBox Pro** - task manager with recurring tasks and local-first storage. [App Store](#)
- **Revisit** - save-now, read-later with offline article storage. [App Store](#)

EXPERIENCE

Senior Full Stack Developer - DigiServNetwork

Jan 2022 - Present

- Promoted to senior engineer, leading technical delivery within a team of 8-10 engineers, designers, and interns building Flutter and Next.js applications.
- Led technical delivery on 8+ production applications across e-commerce, social, hospitality, and business-tooling domains, owning architecture, code review, and App Store / Play Store release cycles.
- Worked async with international clients in the US, Europe, and the Gulf - scoping requirements, running demos, and shipping to agreed deadlines across large time-zone gaps.
- Hired, onboarded, and mentored junior developers and interns, establishing code review standards and a shared component library reused across client projects.
- Built and launched 7 in-house SaaS products end to end, from empty repository to paying customers

Junior Full Stack Developer - DigiServNetwork

Apr 2019 - Dec 2021

- Built and shipped features across Flutter mobile and Next.js web applications for international clients in e-commerce, social, and business-tooling domains.
- Implemented state management (GetX, Bloc) and modular feature architecture, improving performance on low-end Android devices.
- Cut API latency substantially by redesigning data fetching around pagination, request batching, and a local caching layer.
- Owned App Store / Play Store release cycles and contributed to code review and shared component libraries.

Flutter Developer (Contract) - PartsBuddy

Jan 2023 - Jul 2023

- Embedded with the client's in-house team to build and scale a cross-platform e-commerce app with secure checkout and real-time order updates.
- Integrated Stripe end to end, including webhooks, retries, and failed-payment recovery.
- Designed a real-time bridge between the Flutter app and Unity3D modules to deliver interactive 3D product views.
- Added unit, integration, and end-to-end test coverage, cutting regressions reaching production.

Junior Software Developer - IoConix

Jul 2018 - Apr 2019

- Delivered frontend features and contributed to product scoping.
- Evaluated Flutter and React for the team, informing the framework choice for subsequent projects.

FREELANCE

Occasional Upwork contract work (Top Rated, high job success score) - Flutter and Next.js builds for international clients, including MVPs, App Store releases, and full-stack Supabase applications.

EDUCATION

B.Sc. Electrical Engineering - University of Engineering and Technology, Taxila

2013 - 2017 | Final Year Design Project position holder
